## REACH Notification Jun 2022

---

The European Regulation 1907/2006 on the Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH \*) entered into force on 1st of June, 2007.

Most of our products, inclusive their accessories kits, components and packaging, we are placing in the market are “products” in the meaning of REACH.

In accordance with Article 7 our products are not applicable for pre-registration objects. The total amount of the substance present in all articles produced and/or imported, which contain more than 0.1% weight by weight (w/w) of the substance, do not exceed 1 tonne per year. Additionally the materials used in our products are not intended to be released under normal or reasonably foreseeable conditions of use.

Article 33 of REACH requires suppliers to inform recipients and respond to consumer enquiries if an article contains more than 0.1% weight by weight (w/w) of any substance on the Substances of Very High Concern (SVHC) candidate list published by the European Chemicals Agency (ECHA).

In accordance with Article 3 article means an object which during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition. Therefore an article in the meaning of REACH can be part of a product.

Under the scope of Article 59 of REACH, the SVHC candidate list has last been published on the **10th of Jun, 2022**, by the European Chemicals Agency (ECHA) with currently **224 substances** at

<http://echa.europa.eu/candidate-list-table>

Based on information provided by our suppliers, IM has identified materials within our products\*\* that may contain the substances listed in the scope of REACH regulations in concentrations higher than 0.1 % weight by weight (w/w) as stated below:

Name of substance	EC No.	CAS No.	Date of inclusion	intrinsic property referred to in Art. 57	Decision	Comment / usage
4,4'-isopropylidenediphenol	201-245-8	80-05-7	12.01.2017	Toxic for reproduction (Article 57c) Endocrine disrupting properties (Article 57(f) - environment) Endocrine disrupting properties (Article 57(f) - human health)	ED/30/2017 ED/01/2017 ED 01/2018	DRAM component

In addition, Intelligent Memory Limited undertakes regular reviews and checks within the supply chain to ensure the necessary quality controls are in place. If necessary, we will notify our customers of any changes that may affect the safe usage of our products.

\* European Regulation No. 1907/2006 of the European Parliament and the council at December 18, 2006 for registration, assessment, approval and restriction of chemical substances (**REACH**)
